**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**IN THE CLAIMS:**

Claim 35: delete “- -” at the end of the claim.

***Allowable Subject Matter***

1. Claims 1-14, 18, 20-31 and 33-35 are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art to the claim subject matter is Le Strat et al. (6,134,220). Le Strat discloses a method and apparatus for allocating a transmission capacity to connections in a radio communication system wherein the radio communication system is a mobile radio system, comprising: allocating a transmission rate to a connection established via a radio communication interface between a base transceiver station and a subscriber station in at least one of downlink and uplink directions in dependence of signal quality comprising: interference situation at a location of the subscriber station in a radio cell of the base transceiver station, wherein the interference situation comprises intracell interference; a distance between the subscriber station and the base transceiver station; the power of the received signal; bit error rate; signal to noise ratio;

Art Unit: 2682

estimate of the impulse response; a current load in a radio cell of the base transceiver station. However, none of prior arts of record, neither alone or in combination, teaches the steps of: carrying out, with a Radio Resource Control layer (RRC) in the radio communication system, a long-term transmission rate allocation in dependence on at least one of the connection-specific path loss or a transmitter power or carrying out, without the RRC layer, a short-term transmission rate allocation in dependence on at least one of the connection-specific path loss or a transmitter power; and varying the transmission rate by using Transport Format Set configuration/reconfiguration or Transport Format Set restriction procedures of the Radio Resource Control layer as specified in claims 1, 33-34 as well as in the Applicant's response filed on December 08, 2004 (See Remark, page 13-15).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
